

## ALHPA GARDEN Highlights in July

※The flowering time would be changed depending on the climate of the year.  
 ※The 2023 is blooming somewhat earlier.

**【Hydrangea Family】** We don't have many hydrangeas on our campus, but we do see some varieties of the Japanese Hydrangea macrophylla family. Colors range from blue to pink depending on location. The names of the unmarked variety are unknown.

① *Hydrangea macrophylla* f. *variegata*  
*Hydrangea macrophylla* (Lacecap Hydrangea) with variegated leaves.

② *Hydrangea macrophylla* f. *concavosepala*  
 Decorative flowers become thick and bowl-shaped.

③ *Hydrangea macrophylla* f. *normalis* 'Enzindom'  
 An old variety with a beautiful dark blue color.

④ *Hydrangea macrophylla* f. *normalis* 'Sumida-no-hanabi'  
*Hydrangea macrophylla* (Lacecap Hydrangea) looks like big fireworks. "Hanabi" means fireworks in Japanese.

### 《Hydrangea native to America》

⑤ *Hydrangea quercifolia* 'Snow Queen'  
 Native Hydrangea in America, with fragrance.

⑥ *Hydrangea quercifolia* 'Snow Flake'  
 Double-flowered variety of ⑤. Flowers last long.

⑦ *Hydrangea arborescens* 'Annabelle'  
 Native to America, easy to care. It is becoming popular.

⑧ *Hydrangea arborescens* 'Pink Annabelle'  
 An improved variety of Annabelle. Flowers are small.

### 【Other Flowering Trees】

⑨ *Abelia x grandiflora*  
 Left: *Abelia x grandiflora* 'Edward Goucher', having pink petals.  
 Right: *Abelia x grandiflora* 'Kaleidoscope', having yellow variegated foliage.

⑩ *Campsis radicans*  
 Hardy climbing wood.

⑪ *Heimia myrtifolia*  
 Small flowering tree native to Brazil

⑫ *Lespedeza thunbergii*  
*Lespedeza* is common in northern part of Honshu, the main island in Japan. Often used in horticulture.

### 【Waterside Flowers】

⑬ *Lythraceae salicaria*  
 A perennial plant that grows near water, which has denser clusters of flowers than *Lythrum anceps*. This is invasive, so needs to be looked after.

⑭ *Pontederia cordata*  
 An aquatic plant native to North America. The bluish flower color looks refreshing.

⑮ *Saururus chinensis*  
 Japanese name 「Hangeshou」 is named after "hangeshou" as one of the seventy-two climates, around July 2nd. Around this time, leaves closest to flowers turn into white and back into green after flowering.  
 「Hangeshou」 can be divided into two part, han: half and geshou: makeup. That is why, this is also called 「half-makeup」.  
 A member of the Saururaceae family, it has a distinctive odor.

【Flowers】2022 Production Naturalistic Garden Area boasts summer flowers blooming from early summer. 2023 Production Naturalistic Garden Area created in the theme course is also beginning to bloom. “※” means annual plants.
